Location: Warangal, Telangana
LinkedIn: linkedin.com/in/chinmai-mokida
Web: chinmaimokida.github.io/portfolio

TARGET ROLES

- Seed Production & Quality
- Agricultural Research / R&D
- Field Operations & Agronomy
- Agricultural Extension
- Rural Development

LANGUAGES

- English — Professional
- Telugu — Native
- Hindi — Professional

EDUCATION

B.Sc. Agriculture (Hons)
SR University
2022 – 2026 (Expected)
ICAR Accredited

LEADERSHIP

- SR University Sports Rep
- Basketball · Kho Kho
- Cricket · Volleyball
- Throwball

PROFILE

Results-driven Agriculture graduate with a proven track record spanning seed quality testing, field crop management, precision agriculture research, and farmer extension initiatives. Currently working as a Seed Quality Technician at Nuziveedu Seeds Pvt Ltd (2026), building on a completed Seed Quality Testing Internship at Bayer and led IoT-based research in automated seed sowing. Equally comfortable conducting laboratory analyses, monitoring foundation seed farms, and engaging smallholder farmers through awareness programmes. Committed to sustainable, science-led agriculture across research, production, and community extension roles.

EXPERIENCE

Seed Quality Technician Jul 2026 – Present
Nuziveedu Seeds Pvt Ltd India

- Evaluate seed lots for physiological purity, germination rates, and genetic integrity against ISTA and company quality standards
- Maintain structured quality records and compliance documentation for parent and commercial seed lots
- Collaborate with quality and production teams on foundation seed multiplication workflows and HSE protocols
- Apply working knowledge of seed production operations and internal audit requirements

Seed Quality Testing Intern Mar – Jun 2026
Bayer Crop Science India

- Evaluated seed lots for physiological purity, germination rates, and genetic integrity per Bayer quality standards
- Maintained structured quality records and compliance documentation for parent and commercial seed lots
- Collaborated with quality and production teams to understand foundation seed multiplication workflows and HSE protocols
- Developed working knowledge of seed production operations and internal audit requirements

RAWEP Field Intern 2025 – 2026
SR University / ICAR Programme Gantoorpally, Telangana

- Conducted rural agricultural field work under the RAWEP (Rural Agricultural Work Experience Programme)
- Delivered farmer awareness sessions on Credit Lending Institutions, e-NAM (National Agriculture Market), and digital price apps (Rythu Bandhu, Kisan Suvidha, AgriMarket, AgMarkNet 2.0)
- Documented field observations in structured lab record formats for academic and institutional reporting
- Engaged with smallholder farming communities to understand ground-level challenges and extension needs

Farm Operations Assistant 2018 – Present
Family Farm Andhra Pradesh, India

- Managed full crop cycles — field prep, sowing, irrigation scheduling, pest management, and post-harvest handling
- Applied fertilisers and crop protection products following dosage, timing, and IPM safety protocols
- Monitored and recorded crop growth patterns, pest pressure, and environmental conditions across multiple varieties
- Coordinated seasonal labour for timely field operations including weeding, harvesting, and storage

RESEARCH & PROJECTS

IoT-Enabled Automatic Seed Sowing System 2023 – 2024
SR University Warangal

- Designed an automated seed sowing device integrating IoT sensors for real-time soil moisture, temperature, and condition monitoring
- Calibrated system parameters for optimal seed spacing and depth across varieties — improving germination and reducing wastage

EDUCATION

B.Sc. Agriculture (Hons)
SR University
2022 – 2026 (Expected)
ICAR Accredited

LEADERSHIP

- SR University Sports Rep
- Basketball · Kho Kho
- Cricket · Volleyball
- Throwball

- Built mobile interface for remote monitoring and data-driven field decision-making; presented to faculty panel

Pesticide Efficacy Study

SR University

2023
Warangal

- Designed controlled experiments to assess pesticide formulation impact on crop health, yield, and soil microbiome
- Analysed data statistically and recommended evidence-based IPM alternatives for sustainable pest control

Soil Health Improvement Plan

SR University

2023
Warangal

- Conducted soil sampling and lab testing across profiles to detect macro/micronutrient deficiencies
- Recommended targeted amendments to restore soil fertility; documented findings in structured agronomic reports

PUBLICATION

Calcium Arkh: An Ancient Wisdom for Modern Agriculture — SR University
Academic Journal, 2023–24

Investigated traditional calcium-based soil treatments to address modern crop nutrition and productivity challenges. Recognised for contribution to sustainable farming and practical agronomic science.

TECHNICAL SKILLS

Seed & Production

Foundation seed quality · Physiological purity · Genetic purity assessment · Seed multiplication · Germination testing

Field & Agronomy

Crop monitoring · Yield forecasting · Soil sampling & testing · IPM · Fertiliser application · Irrigation scheduling

Research & Data

Experimental design · Field data collection · Statistical analysis · Scientific reporting · Literature review

Technology

IoT-based agricultural monitoring · Sensor data interpretation · Precision agriculture · MS Office (Excel, Word, PowerPoint)

Extension & Communication

Farmer awareness programmes · e-NAM / digital price apps · Rural community engagement · Institutional credit awareness

CERTIFICATIONS & TRAINING

- 15-Day International Workshop — Just Agriculture Education Group & AEEFWS | Advanced agricultural research & global innovations
- HITASA — 6th International Conference on Agricultural Science & Crop Technology
- National Symposium: 'Save the Food with Advanced Technology' (2023) | Post-harvest science & crop protection
- IoT in Agriculture — Sensor-based monitoring and precision farming systems
- Certificate of Appreciation — YTRA: The Revolutionary Expo | Agricultural innovation
